

Hearth Outreach Program

Hearth Outreach workers canvas Boston area shelters weekly and collaborate with shelter staff and other community case managers to connect with homeless individuals over 50 years old who are motivated towards the goal of permanent housing. Referrals are preferably made through our partnered shelter case management staff. Eligible clients are encouraged to connect with shelter staff and pull together vital records, documents, and details of any housing history. Hearth Outreach workers provide housing search and advocacy services as well as general case management around health, behavioral health, and basic needs. Hearth Outreach workers also provide 6 months of stabilization services once a client is housed.

Outreach Director: Adrienne Beloin LICSW
